Price list current as of Modification #PS-0023 effective May 26, 2023

Prices Shown Herein are Net (discount deducted)

CUSTOMER INFORMATION

1a. Table of awarded special item number(s) with appropriate cross-reference to item descriptions and awarded price(s).

SIN 518210C/STLOC/RC – Cloud and Cloud IT Related Professional Services

SIN 54151S/STLOC/RC – Information Technology Professional Services

SIN 54151HEAL//STLOC/RC – Health IT Professional Services

SIN 54151HACS/STLOC/RC – Highly Adaptive Cybersecurity Services (HACS)

SIN 54151ECOM/STLOC/RC – Electronic Commerce & Subscription Services

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.

Not Applicable

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. **See attached pricelist on page 4.**

2. Maximum order. **\$500,000 per order/ per SIN**

3. Minimum order. **\$100**

4. Geographic coverage (delivery area). **Worldwide**

5. Point(s) of production (city, county, and State or foreign country). **Not Applicable**

6. Discount from list prices or statement of net price. **Government Net Prices (discounts already deducted.)**

7. Quantity discounts. **None**

8. Prompt payment discount. **Net 30 days.** Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. Foreign items (list items by country of origin). **Not Applicable**

10a. Time of delivery. **To be negotiated with end user.**

10b. Expedited Delivery. **To be negotiated with end user.**

10c. Overnight and 2-day delivery. **Not Applicable**

10d. Urgent Requirements. The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery. **To be negotiated with end user.**

11. F.O.B. point(s). **Destination**

12a. Ordering address(es).

Innovative Management Concepts, Inc.
21400 Ridgetop Circle, Suite 160
Dulles, VA 20166
(703) 318-8044
www.imcva.com

12b. Ordering procedures: See Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es).

Innovative Management Concepts, Inc.
21400 Ridgetop Circle, Suite 160
Dulles, VA 20166

14. Warranty provision. **IMC guarantees that all services and associated support services provided under this contract shall meet the minimum standards as described in IMC's Authorized IT Schedule Price List.**

15. Export packing charges, if applicable. **Not Applicable**

16. Terms and conditions of rental, maintenance, and repair (if applicable). **Not Applicable**

17. Terms and conditions of installation (if applicable). **Not Applicable**

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). **Not Applicable**

18b. Terms and conditions for any other services (if applicable). **Not Applicable**

19. List of service and distribution points (if applicable). **Not Applicable**

20. List of participating dealers (if applicable). **Not Applicable**

21. Preventive maintenance (if applicable). **Not Applicable**

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). **Not Applicable**

22b. If applicable, indicate that Section 508 compliance information is available for the information and communications technology (ICT) products and services and show where full details can be found (e.g. contractor's website or other location.) ICT accessibility standards can be found at:www.Section508.gov/.
Not Applicable

23. Unique Entity Identification (UEIN) Number. **E1KJG94MCPL7**

24. Notification regarding registration in the System for Award Management (SAM) database.
IMC is registered with the SAM. The Cage Code is 06WG5.

Section II Terms and Conditions for all IT Contractors

1) Organizational Conflicts Of Interest

a) Definitions.

"Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

b) To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508

2) Services Performed

a) All services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

b) The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.

c) The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

3) Travel. Any Contractor travel required in the performance of services must comply with the Pub. L. 99-234 and FAR Part 31.205-46, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel.

4) Warranty

a) IMC guarantees that all services and associated support services provided under this contract shall meet the minimum standards as described in IMC's Authorized IT Schedule Price List.

b) The Contractor's commercial guarantee/warranty shall be included in the Commercial Supplier Agreement to include Enterprise User License Agreements or Terms of Service (TOS) agreements, if applicable.

c) Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the ordering activity for consequential damages resulting from any defect or deficiencies in accepted items.

Monthly	1 Year	\$3,577.06

****INCIDENTAL SUPPORT COSTS** - Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR. IMC offers a comprehensive range of hosting solutions to the Federal Government and commercial organizations ranging from simple colocation to cloud services to fully managed environments, depending upon the customer requirements. IMC hosting facilities use the latest materials, techniques, planning and equipment to ensure absolute reliability for our customer's mission critical environments. Each hosting center sits directly on a fiber optic, OC-192, SONET backbone. This means that each customer's deployment has immediate access to virtually unlimited gigabit capacity and corresponding exceptional performance. Each IMC hosting center also meets or well exceeds Tier 3 classification requirements for redundancy, critical systems and construction. *

* *"Industry Standard Tier Classifications Define Site Infrastructure Performance" W. Pitt Turner, Kenneth Brill, The Uptime Institute, 2001, 2003*

IMC has Hosting Centers across the United States and the capability to expand to other locations rapidly. IMC may host sensitive but unclassified data in our facilities, unless a SCIF environment is incorporated and approved. This includes the higher levels of physical and data security required for highly Classified environments. Also, the IMC Federal support team has been cleared to Public Trust positions and been granted DoD security clearances. No foreign nationals work on IMC's Federal hosting projects.

LABOR CATEGORY DESCRIPTIONS

Educational Substitution & Work Experience Requirements

Position Minimum Educational Requirements				
High School Diploma		Associate's Degree	Bachelor's Degree	Master's Degree
High School Diploma	Meets minimum qualifications	High School Diploma + 2 years of relevant experience	High School Diploma + 4 years of relevant experience	High School Diploma + 6 years of relevant experience
Associate's Degree	Exceeds qualifications minimum	Meets minimum qualifications	Associate's Degree + 2 years of relevant experience	Associate's Degree + 4 years of relevant experience
Bachelor's Degree	Exceeds qualifications minimum	Exceeds minimum qualifications	Meets minimum qualifications	Bachelor's Degree + 2 years of relevant experience

Cloud and Cloud Related IT Professional Services

1. Journeyman Cloud IT Application Developer Level II

Minimum/General Experience: 2 years of relevant experience.

Functional Responsibility: Participates in the planning, design, and implementation of various cloud related technology products, or enhancements to computer programs. Translates detailed design into computer software in a cloud environment. Tests, debugs, and refines the software to produce the required product. Prepares required documentation, including both program-level and user-level documentation. Enhances software to reduce operating time or improve efficiency.

Minimum Education: Bachelor's Degree

2. Journeyman Cloud IT Computer Systems Analyst

Minimum/General Experience: 1 year of relevant experience.

Functional Responsibility: Administers a Program, Project or Organization's database using database management systems to organize and store data in a cloud environment. Determines user requirements, creates computer database, tests and coordinates changes. Works closely with and Interacts with developer and end-user personnel to determine application data access requirements, transaction rates, volume analysis, and other pertinent data required to develop and maintain integrated cloud databases. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Associate's Degree

3. Journeyman Cloud IT Data Management Specialist

Minimum/General Experience: 2 years of relevant experience.

Functional Responsibility: Performs tasks that ensure strategic and coordinated cloud data systems management, accuracy, integrity of data and reporting of data to internal and external stakeholders. Ensuring timely and accurate reports, establishing, maintaining and updating databases and records for recurring internal reports. Recommends and implements new operating methods to improve data flow, collection, processing and distribution.

Minimum Education: Bachelor's Degree

4. Journeyman Cloud IT Training Manager

Minimum/General Experience: 1 year of relevant experience.

Functional Responsibility: Works across departments and with many stakeholders to support training and ensure that the training developed by the organization meets the needs of each function and is aligned with the goals of the business. Identifies and assesses future and current training needs, deploys a wide variety of training methods, conducts orientation sessions, monitors training program's effectiveness, and tailors training programs as necessary.

Minimum Education: Bachelor's Degree

5. Journeyman Cloud IT Systems Engineer

Minimum/General Experience: 3 years of relevant experience.

Functional Responsibility: Develops and applies advanced methods, theories and research techniques to define engineering requirements, guidance and direction for implementation and testing of Cloud information systems. Assists with the assessments of cloud architecture and current hardware limitations, define and design complex cloud system specifications, input/output processes and working parameters for hardware/software compatibility.

Minimum Education: Bachelor's Degree

6. Journeyman Cloud IT Technical Writer/Editor

Minimum/General Experience: 3 years of relevant experience.

Functional Responsibility: Assists in the collection and organizing of information required for preparation of user manuals, training materials, installation guides, proposals and reports for Cloud IT programs and activities. Edits functional descriptions, system specifications, user manuals, special reports, or any other customer deliverables and documents.

Minimum Education: Associate's Degree

7. Junior Cloud IT Cyber Security Specialist

Minimum/General Experience: 1 year of relevant experience.

Functional Responsibility: Provides monitoring, auditing, scanning, and other technical analysis and reporting as needed for compliance with security requirements for cloud related programs, systems, applications and environments. Responsible for physical cloud security assessments of servers, computer systems, and networks. Conducts regular security audits. Completes network mapping to identify live hosts and active Ports, Protocols and Services (PPS) and analyze the results of data to identify risk. Assists in conducting vulnerability and system compliance assessments for Cyber Vulnerability Assessments (CVA).

Minimum Education: Bachelor's Degree

8. Senior Cloud IT Computer Systems Analyst

Minimum/General Experience: 3 years of relevant experience.

Functional Responsibility: Responsible for analyzing cloud related information requirements. Evaluates analytical and systematic problems of workflow. Provides organization, planning and leads analysts to develop appropriate corrective actions. Prepares developing plans for cloud information systems from project inception to closeout. Defines problems and develops system requirements and program specifications. Provides guidance and supervision to daily support staff.

Minimum Education: Bachelor's Degree

9. Senior Cloud IT Cyber Security Specialist

Minimum/General Experience: 4 years of relevant experience.

Functional Responsibility: Supports the implementation of enterprise and system security requirements for complex Cloud IT systems. Analyzes user, policy, and regulatory requirements and resource demands and coordinates with customer organization to establish and define programs, resources, and risks. Performs monitoring, auditing, scanning, and other technical analysis and reporting as needed for compliance with security requirements. May be responsible for physical security assessments of cloud servers, computer systems, and networks. May conducts regular security audits. May complete network mapping to identify live hosts and active Ports, Protocols and Services (PPS) and analyze the results of data to identify risk. Leads vulnerability and system compliance assessments for Cyber Vulnerability Assessments (CVA). Provides guidance and supervision to daily support staff.

Minimum Education: Bachelor's Degree

10. Senior Cloud IT Data Analyst

Minimum/General Experience: 5 years of relevant experience.

Functional Responsibility: Develops data models to implement for business needs related to Cloud IT programs and activities. Uses and supports database applications and analytical tools in a cloud environment. Performs research, documents and establishes standards and protocols for data analysis.

Minimum Education: Bachelor's Degree

11. Senior Cloud IT Data Security Specialist

Minimum/General Experience: 3 years of relevant experience.

Functional Responsibility: Leads and manages data security operations. Provides support to plan, coordinate and implement the organization's information security for cloud programs and activities. Provides support for facilitating and identifying current security issues on data networks. Maintains working knowledge of business security practices and procedures, current security tools, hardware/software and their implementation.

Minimum Education: Bachelor's Degree

12. Senior Cloud IT Project Manager

Minimum/General Experience: 6 years of relevant experience.

Functional Responsibility: Performs analysis, provides solution definition, and supports product releases that deliver high quality applications. Able to rapidly understand the business issues and data challenges of target markets and industries of the application. The Cloud IT PM I utilize technical and business expertise to evaluate project needs. By acquiring a deep understanding of the application domain and researching how functionality is to be used in customer environments, they have the ability to apply this functional knowledge and expertise to design value and add features that meet the needs of our clients. With both a technical and business perspective, they are able to develop functional and system design specifications that meet the business requirements of the proposed cloud system.

Minimum Education: Bachelor's Degree

13. Senior Cloud IT Systems Engineer

Minimum/General Experience: 5 years of relevant experience.

Functional Responsibility: Develops and applies advanced methods, theories and research techniques to define engineering requirements, guidance and direction for implementation and testing of Cloud information systems. Conducts assessments of cloud architecture and current hardware limitations, define and design complex Cloud IT system specifications, input/output processes and working parameters for hardware/software compatibility. Plans, conducts and technically directs projects or major phases of significant Cloud related projects. Provides guidance and supervision to daily support staff.

Minimum Education: Bachelor's Degree

14. Senior Cloud IT Application Developer

Minimum/General Experience: 5 years of relevant experience.

Functional Responsibility: Leads and manages the planning, design, and implementation of various cloud related technology products, or enhancements to computer programs. Translates detailed design into computer software. Tests, debugs, and refines the cloud software to produce the required product. Prepares required documentation, including both program-level and user-level documentation. Enhances software to reduce operating time or improve efficiency. Assists engineers and lower-level programmers to interpret software requirements and design specifications to code and integrates and tests software components.

Minimum Education: Bachelor's Degree

15. SME - Cloud IT Application Developer

Minimum/General Experience: 4 years of relevant experience.

Functional Responsibility: Leads the planning, design, and implementation of various cloud related technology products, or enhancements to computer programs. Translates detailed design into computer software in a cloud environment. Tests, debugs, and refines the software to produce the required product. Prepares required documentation, including both program-level and user-level documentation. Enhances software to reduce operating time or improve efficiency. Assists engineers and lower-level programmers to interpret software requirements and design specifications to code and integrates and tests software components. Performs quality control and quality assurance procedures when required. Provides guidance and supervision to daily support staff.

Minimum Education: Bachelor's Degree

16. SME - Cloud IT Subject Matter Expert

Minimum/General Experience: 6 years of relevant experience.

Functional Responsibility: Provides Cloud related IT technical, managerial, and administrative direction for problem resolution including, but not limited to: Cloud analysis, requirements development, and implementation for complex cloud systems and/or solutions. Makes recommendations and advises on Cloud IT system improvements, complex architecture, automated capabilities, networking and communications, software and hardware solutions, and modeling and simulation.

Minimum Education: Bachelor's Degree

IT Professional Services

1. Journeyman Computer and Information Systems Manager

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Plan, direct, or coordinate activities in such fields as electronic data processing, information technology systems, IT systems analysis, and computer data programming. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

2. Journeyman Computer Hardware Engineer

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Research, design, develop, or test computer or computer-related equipment for commercial, industrial, military, or scientific use. May supervise the manufacturing and installation of computer or computer-related equipment and components. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

3. Journeyman Computer Network Architect

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Design and implement computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, extranets, and other data communications networks. Perform network modeling, analysis, and planning. May also design network and computer security measures. May research and recommend network and data communications hardware and software. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

4. Journeyman Computer Network Support Specialist

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Analyze, test, troubleshoot, and evaluate existing network systems, such as local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Perform network maintenance to ensure computer networks operate correctly with minimal interruption. Possesses and applies expertise on multiple complex IT work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

5. Journeyman Computer Operator

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Monitor and control electronic computer and peripheral electronic data processing equipment to process business, scientific, engineering, and other data according to operating instructions. Monitor and respond to computer operating and error messages. May enter commands at a computer terminal and set controls on computer and peripheral devices. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

6. Journeyman Computer Programmer

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Create, modify, and test the computer code, forms, and IT script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and information. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

7. Journeyman Computer Systems Analyst

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Analyze computer science, engineering, business, and other data processing problems to implement and improve computer and information technology systems. Analyze user requirements, procedures, and problems to automate or improve existing IT systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available computer software. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

8. Journeyman Computer Systems Engineer/Architect

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Design and develop IT solutions to complex computer application problems, IT system administration issues, or network concerns. Perform systems management and integration functions. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

9. Journeyman Computer User Support Specialist

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Provide technical assistance to computer users. Answer questions or resolve computer problems for clients in person, or via telephone or electronically. May provide assistance concerning the use of computer hardware and software, including printing, installation, word processing, electronic mail, and operating systems. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Associate's Degree

10. Journeyman Data Warehousing Specialist

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

11. Journeyman Database Administrator

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Administer, test, and implement computer databases, applying knowledge of computer database management systems. Coordinate changes to computer databases. May plan, coordinate, and implement security measures to safeguard computer databases. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

12. Journeyman Database Architect

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Design strategies for enterprise database systems and set standards for computer database operations, programming, and security. Design and construct large relational computer databases. Integrate new IT systems with existing database warehouse structure and refine computer system performance and functionality. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

13. Journeyman Document Management Specialist

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Implement and administer enterprise-wide information technology document management systems and related procedures that allow organizations to capture, store, retrieve, share, and destroy electronic data records and documents. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

14. Journeyman Information Security Analyst

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor information technology security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

15. Journeyman Information Technology Project Manager

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Plan, initiate, and manage information technology (IT) projects. Lead and guide the work of technical staff. Serve as liaison between business and technical aspects of projects. Plan project stages and assess business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

16. Journeyman Network and Computer Systems Administrator

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Monitor network to ensure computer network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists. May administer network security measures.

Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

17. Journeyman Software Developer, Applications

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Develop, create, and modify general computer application software or specialized utility programs. Analyze computer user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing IT operational efficiency. May analyze and design computer databases within an application area, working individually or coordinating database development as part of a team. May supervise computer programmers. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

18. Journeyman Software Developer, Systems Software

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Research, design, develop, and test operating systems-level software, compilers, and computer network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general IT computing applications. Set operational specifications and formulate and analyze IT software requirements. May design embedded systems software. Apply principles and techniques of computer science, engineering, and mathematical analysis. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

19. Journeyman Software Quality Assurance Engineer and Tester

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Develop and execute computer software test plans in order to identify software problems and their causes. Possesses and applies expertise on multiple complex IT work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

20. Journeyman Telecommunications Engineering Specialist

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

21. Journeyman Telecommunications Equipment Installer and Repairer

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Install, set-up, rearrange, or remove switching, distribution, routing, and dialing equipment used in central offices or head ends. Service or repair telephone, cable television, Internet, and other communications equipment on customers' property. May install communications equipment or communications wiring in buildings. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Associate's Degree

22. Journeyman Web Administrator

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Manage web environment design, deployment, development and maintenance activities. Perform testing and quality assurance of web sites and web applications. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

23. Journeyman Web Developer

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Design, create, and modify Web sites. Analyze user needs to implement Web site content, graphics, performance, and capacity. May integrate Web sites with other computer applications. May convert written, graphic, audio, and video components to compatible Web formats by using software designed to facilitate the creation of Web and multimedia content. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

24. Junior Computer and Information Systems Manager

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Plan, direct, or coordinate activities in such fields as electronic data processing, information technology systems, IT systems analysis, and computer data programming. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

25. Junior Computer Hardware Engineer

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Research, design, develop, or test computer or computer-related equipment for commercial, industrial, military, or scientific use. May supervise the manufacturing and installation of computer or computer-related equipment and components. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

26. Junior Computer Network Architect

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Design and implement computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, extranets, and other data communications networks. Perform network modeling, analysis, and planning. May also design network and computer security measures. May research and recommend network and data communications hardware and software. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

27. Junior Computer Network Support Specialist

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Analyze, test, troubleshoot, and evaluate existing network systems, such as local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Perform network maintenance to ensure computer networks operate correctly with minimal interruption. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

28. Junior Computer Operator

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Monitor and control electronic computer and peripheral electronic data processing equipment to process business, scientific, engineering, and other data according to operating instructions. Monitor and respond to computer operating and error messages. May enter commands at a computer terminal and set controls on computer and peripheral devices. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

29. Junior Computer Programmer

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Create, modify, and test the computer code, forms, and IT script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and information. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and

training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

30. Junior Computer Systems Analyst

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Analyze computer science, engineering, business, and other data processing problems to implement and improve computer and information technology systems. Analyze user requirements, procedures, and problems to automate or improve existing IT systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available computer software. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

31. Junior Computer Systems Engineer/Architect

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Design and develop IT solutions to complex computer application problems, IT system administration issues, or network concerns. Perform systems management and integration functions. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

32. Junior Computer User Support Specialist

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Provide technical assistance to computer users. Answer questions or resolve computer problems for clients in person, or via telephone or electronically. May provide assistance concerning the use of computer hardware and software, including printing, installation, word processing, electronic mail, and operating systems. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Associate's Degree

33. Junior Data Warehousing Specialist

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

34. Junior Database Administrator

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Administer, test, and implement computer databases, applying knowledge of computer database management systems. Coordinate changes to computer databases. May plan, coordinate, and implement security measures to safeguard computer databases. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

35. Junior Database Architect

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Design strategies for enterprise database systems and set standards for computer database operations, programming, and security. Design and construct large relational computer databases. Integrate new IT systems with existing database warehouse structure and refine computer system performance and functionality. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that

requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

36. Junior Document Management Specialist

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Implement and administer enterprise-wide information technology document management systems and related procedures that allow organizations to capture, store, retrieve, share, and destroy electronic data records and documents. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

37. Junior Information Security Analyst

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor information technology security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

38. Junior Information Technology Project Manager

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Plan, initiate, and manage information technology (IT) projects. Lead and guide the work of technical staff. Serve as liaison between business and technical aspects of projects. Plan project stages and assess business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

39. Junior Network and Computer Systems Administrator

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Monitor network to ensure computer network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists. May administer network security measures. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

40. Junior Software Developer, Applications

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Develop, create, and modify general computer application software or specialized utility programs. Analyze computer user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing IT operational efficiency. May analyze and design computer databases within an application area, working individually or coordinating database development as part of a team. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

41. Junior Software Developer, Systems Software

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Research, design, develop, and test operating systems-level software, compilers, and computer network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general IT computing applications. Set operational specifications and formulate and analyze IT software requirements. May design embedded systems software. Apply principles and techniques of computer science, engineering, and mathematical analysis. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

42. Junior Software Quality Assurance Engineer and Tester

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Develop and execute computer software test plans in order to identify software problems and their causes. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

43. Junior Telecommunications Engineering Specialist

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

44. Junior Telecommunications Equipment Installer and Repairer

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Install, set-up, rearrange, or remove switching, distribution, routing, and dialing equipment used in central offices or headend. Service or repair telephone, cable television, Internet, and other communications equipment on customers' property. May install communications equipment or communications wiring in buildings. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Associate's Degree

45. Junior Web Administrator

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Manage web environment design, deployment, development and maintenance activities. Perform testing and quality assurance of web sites and web applications. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

46. Junior Web Developer

Minimum/General Experience: 0 - 2 years of relevant experience.

Functional Responsibility: Design, create, and modify Web sites. Analyze user needs to implement Web site content, graphics, performance, and capacity. May integrate Web sites with other computer applications. May convert written, graphic, audio, and video components to compatible Web formats by using software designed to facilitate the creation of Web and multimedia content. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree

47. Senior Computer and Information Systems Manager

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Plan, direct, or coordinate activities in such fields as electronic data processing, information technology systems, IT systems analysis, and computer data programming. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

48. Senior Computer Hardware Engineer

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Research, design, develop, or test computer or computer-related equipment for commercial, industrial, military, or scientific use. May supervise the manufacturing and installation of computer or computer-related equipment and components. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

49. Senior Computer Network Architect

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Design and implement computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, extranets, and other data communications networks. Perform network modeling, analysis, and planning. May also design network and computer security measures. May research and recommend network and data communications hardware and software. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

50. Senior Computer Network Support Specialist

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Analyze, test, troubleshoot, and evaluate existing network systems, such as local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Perform network maintenance to ensure computer networks operate correctly with minimal interruption. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

51. Senior Computer Operator

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Monitor and control electronic computer and peripheral electronic data processing equipment to process business, scientific, engineering, and other data according to operating instructions. Monitor and respond to computer operating and error messages. May enter commands at a computer terminal and set controls on computer and peripheral devices. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

52. Senior Computer Programmer

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Create, modify, and test the computer code, forms, and IT script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and information. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

53. Senior Computer Systems Analyst

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Analyze computer science, engineering, business, and other data processing problems to implement and improve computer and information technology systems. Analyze user requirements, procedures, and problems to automate or improve existing IT systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available computer software. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

54. Senior Computer Systems Engineer/Architect

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Design and develop IT solutions to complex computer application problems, IT system administration issues, or network concerns. Perform systems management and integration functions. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

55. Senior Computer User Support Specialist

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Provide technical assistance to computer users. Answer questions or resolve computer problems for clients in person, or via telephone or electronically. May provide assistance concerning the use of computer hardware and software, including printing, installation, word processing, electronic mail, and operating systems. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Associate's Degree

56. Senior Data Warehousing Specialist

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

57. Senior Database Administrator

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Administer, test, and implement computer databases, applying knowledge of computer database management systems. Coordinate changes to computer databases. May plan, coordinate, and implement security measures to safeguard computer databases. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

58. Senior Database Architect

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Design strategies for enterprise database systems and set standards for computer database operations, programming, and security. Design and construct large relational computer databases. Integrate new IT systems with existing database warehouse structure and refine computer system performance and functionality. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

59. Senior Document Management Specialist

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Implement and administer enterprise-wide information technology document management systems and related procedures that allow organizations to capture, store, retrieve, share, and destroy electronic data records and documents. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

60. Senior Information Security Analyst

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor information technology security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

61. Senior Information Technology Project Manager

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Plan, initiate, and manage information technology (IT) projects. Lead and guide the work of technical staff. Serve as liaison between business and technical aspects of projects. Plan project stages and assess business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

62. Senior Network and Computer Systems Administrator

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Monitor network to ensure computer network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists. May administer network security measures. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

63. Senior Software Developer, Applications

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Develop, create, and modify general computer application software or specialized utility programs. Analyze computer user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing IT operational efficiency. May analyze and design computer databases within an application area, working individually or coordinating database development as part of a team. May supervise computer programmers. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

64. Senior Software Developer, Systems Software

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Research, design, develop, and test operating systems-level software, compilers, and computer network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general IT computing applications. Set operational specifications and formulate and analyze IT software requirements. May design embedded systems software. Apply principles and techniques of computer science, engineering, and mathematical analysis. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

65. Senior Software Quality Assurance Engineer and Tester

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Develop and execute computer software test plans in order to identify software problems and their causes. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

66. Senior Telecommunications Engineering Specialist

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates

performance results and recommends major changes affecting short- term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

67. Senior Telecommunications Equipment Installer and Repairer

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Install, set-up, rearrange, or remove switching, distribution, routing, and dialing equipment used in central offices or headends. Service or repair telephone, cable television, Internet, and other communications equipment on customers' property. May install communications equipment or communications wiring in buildings. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Associate's Degree

68. Senior Web Administrator

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Manage web environment design, deployment, development and maintenance activities. Perform testing and quality assurance of web sites and web applications. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

69. Senior Web Developer

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Design, create, and modify Web sites. Analyze user needs to implement Web site content, graphics, performance, and capacity. May integrate Web sites with other computer applications. May convert written, graphic, audio, and video components to compatible Web formats by using software designed to facilitate the creation of Web and multimedia content. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short- term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

70. SME - Computer and Information Systems Manager

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Plan, direct, or coordinate activities in such fields as electronic data processing, information technology systems, IT systems analysis, and computer data programming. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

71. SME - Computer Hardware Engineer

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Research, design, develop, or test computer or computer-related equipment for commercial, industrial, military, or scientific use. May supervise the manufacturing and installation of computer or computer-related equipment and components. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge.

Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

72. SME - Computer Network Architect

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Design and implement computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, extranets, and other data communications networks. Perform network modeling, analysis, and planning. May also design network and computer security measures. May research and recommend network and data communications hardware and software. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

73. SME - Computer Network Support Specialist

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Analyze, test, troubleshoot, and evaluate existing network systems, such as local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Perform network maintenance to ensure computer networks operate correctly with minimal interruption. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

74. SME - Computer Operator

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Monitor and control electronic computer and peripheral electronic data processing equipment to process business, scientific, engineering, and other data according to operating instructions. Monitor and respond to computer operating and error messages. May enter commands at a computer terminal and set controls on computer and peripheral devices. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

75. SME - Computer Programmer

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Create, modify, and test the computer code, forms, and IT script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and information. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for

financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

76. SME - Computer Systems Analyst

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Analyze computer science, engineering, business, and other data processing problems to implement and improve computer and information technology systems. Analyze user requirements, procedures, and problems to automate or improve existing IT systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available computer software. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

77. SME - Computer Systems Engineer/Architect

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Design and develop IT solutions to complex computer application problems, IT system administration issues, or network concerns. Perform systems management and integration functions. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

78. SME - Computer User Support Specialist

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Provide technical assistance to computer users. Answer questions or resolve computer problems for clients in person, or via telephone or electronically. May provide assistance concerning the use of computer hardware and software, including printing, installation, word processing, electronic mail, and operating systems. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Associate's Degree

79. SME - Data Warehousing Specialist

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

80. SME - Database Administrator

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Administer, test, and implement computer databases, applying knowledge of computer database management systems. Coordinate changes to computer databases. May plan, coordinate, and implement security measures to safeguard computer databases. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

81. SME - Database Architect

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Design strategies for enterprise database systems and set standards for computer database operations, programming, and security. Design and construct large relational computer databases. Integrate new IT systems with existing database warehouse structure and refine computer system performance and functionality. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

82. SME - Document Management Specialist

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Implement and administer enterprise-wide information technology document management systems and related procedures that allow organizations to capture, store, retrieve, share, and destroy electronic data records and documents. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

83. SME - Information Security Analyst

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor information technology security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

84. SME - Information Technology Project Manager

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Plan, initiate, and manage information technology (IT) projects. Lead and guide the work of technical staff. Serve as liaison between business and technical aspects of projects. Plan project stages and assess

business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

85. SME - Network and Computer Systems Administrator

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Monitor network to ensure computer network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists. May administer network security measures. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

86. SME - Software Developer, Applications

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Develop, create, and modify general computer application software or specialized utility programs. Analyze computer user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing IT operational efficiency. May analyze and design computer databases within an application area, working individually or coordinating database development as part of a team. May supervise computer programmers. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

87. SME - Software Developer, Systems Software

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Research, design, develop, and test operating systems-level software, compilers, and computer network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general IT computing applications. Set operational specifications and formulate and analyze IT software requirements. May design embedded systems software. Apply principles and techniques of computer science, engineering, and mathematical analysis. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

88. SME - Software Quality Assurance Engineer and Tester

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Develop and execute computer software test plans in order to identify software problems and their causes. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

89. SME - Telecommunications Engineering Specialist

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

90. SME - Telecommunications Equipment Installer and Repairer

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Install, set-up, rearrange, or remove switching, distribution, routing, and dialing equipment used in central offices or headends. Service or repair telephone, cable television, Internet, and other communications equipment on customers' property. May install communications equipment or communications wiring in buildings. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Associate's Degree

91. SME - Web Administrator

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Manage web environment design, deployment, development and maintenance activities. Perform testing and quality assurance of web sites and web applications. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

92. SME - Web Developer

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Design, create, and modify Web sites. Analyze user needs to implement Web site content, graphics, performance, and capacity. May integrate Web sites with other computer applications. May convert written, graphic, audio, and video components to compatible Web formats by using software designed to facilitate the creation of Web and multimedia content. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and

controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree

Health IT Professional Services

1. Journeyman Health IT Computer Systems Analyst

Minimum/General Experience: 2 - 5 years of relevant experience

Functional Responsibility: Analyze computer science, engineering, business, and other data processing problems to implement and improve computer and Health Information Technology systems. Analyze user requirements, procedures, and problems to automate or improve existing IT systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available computer software. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

2. Journeyman Health IT Document Management Specialist

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Implement and administer enterprise-wide Health IT document management systems and related procedures that allow organizations to capture, store, retrieve, share, and destroy electronic data records and documents. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

3. Journeyman Health IT Security Analyst

Minimum/General Experience: 2 - 5 years of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor Health IT security measures for the protection of Health IT computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree

4. Senior Health IT Software Quality Assurance Engineer and Tester

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Develop and execute computer software test plans in order to identify Health Information Technology (HIT) software problems and their causes. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major Technology assignments. Evaluates performance results and recommends major changes affecting short- term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

5. Senior Health IT and Information Systems Program Manager

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Leads a Health IT Team with planning, directing, and coordinating activities in such fields as electronic data processing, information technology systems, IT systems analysis, and computer data programming. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments.

Minimum Education: Bachelor's Degree

6. Senior Health IT Project Manager

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Plan, initiate, and manage Health Information Technology (HIT) projects. Lead and guide the work of technical staff. Serve as liaison between business and technical aspects of projects. Plan project stages and assess business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major Technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

7. Senior Health IT Computer Programmer

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Create, modify, and test the computer code, forms, and script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals for Health Information Technology applications and systems. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and Health Information. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major Technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree.

8. Senior Health IT Computer Systems Analyst

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Analyze computer science, engineering, business, and other data processing problems to implement and improve computer and Health Information Technology systems. Analyze user requirements, procedures, and problems to automate or improve existing IT systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available computer software. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major Technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

9. Senior Health IT Database Administrator

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Administer, test, and implement computer databases, applying knowledge of computer database management systems for Health Information Technology (HIT) applications and systems. Coordinate changes to computer databases. May plan, coordinate, and implement security measures to safeguard computer databases. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major Technology assignments. Evaluates performance results and recommends major changes affecting short term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

10. Senior Health IT Document Management Specialist

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Implement and administer enterprise-wide Health Information Technology document management systems and related procedures that allow organizations to capture, store, retrieve, share, and destroy electronic data records and documents. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major Technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree

11. Senior Health IT Network and Computer Systems Administrator

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system in support of Health Information Technology (HIT) systems. Monitor network to ensure computer network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists. May administer network security measures. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major Technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree.

12. Senior Health IT Security Analyst

Minimum/General Experience: 5 - 10 years of relevant experience.

Functional Responsibility: Plans, implements, upgrades, and monitors Health IT security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree.

13. SME - Health IT Computer Programmer

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Create, modify, and test the computer code, forms, and Health Information Technology script that allow computer applications to run. Work from specifications drawn up by software developers or other individuals. May assist software developers by analyzing user needs and designing software solutions. May develop and write computer programs to store, locate, and retrieve specific documents, data, and Health Information. Provides technical/management leadership on major tasks or Technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree.

14. SME - Health IT Computer Systems Analyst

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Analyze computer science, engineering, business, and other data processing problems to implement and improve computer and Health Information Technology systems. Analyze user requirements, procedures, and problems to automate or improve existing IT systems and review computer system capabilities,

workflow, and scheduling limitations. May analyze or recommend commercially available computer software. Provides technical/management leadership on major tasks or Technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.
Minimum Education: Bachelor's Degree.

15. SME - Health IT Project Manager

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Plan, initiate, and manage Health Information Technology (HIT) projects. Lead and guide the work of technical staff. Serve as liaison between business and technical aspects of projects. Plan project stages and assess business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. Provides technical/management leadership on major tasks or Technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree.

16. SME - Health IT Software Quality Assurance Engineer and Tester

Minimum/General Experience: 10+ years of relevant experience.

Functional Responsibility: Develop and execute computer software test plans in order to identify software problems and their causes. Provides technical/management leadership on major tasks or Health Information Technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Minimum Education: Bachelor's Degree.

Highly Adaptive Cybersecurity Service

1. Cyber Functional Area Expert II

Minimum/General Experience: 5 years of relevant experience.

Functional Responsibility: Oversees multiple medium complex cyber projects. Possesses expert knowledge of business processes. Responsible for performance, cost, scope, schedule, quality, and appropriate business measurements for projects, according to their project charter. Has extensive professional knowledge of market segment/industry/technology/ discipline trends. Anticipates future customer, industry, and business trends. Applies this understanding to complex problems to meet project objectives. As appropriate, challenges the validity of given procedures and processes with a view toward enhancement or improvement. Analyzes information and situations and implement actions, independently and or through the management team to ensure project objectives are met. Analyzes new and complex project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components.

Minimum Education: Bachelor's Degree.

2. Cyber Lead SME

Minimum/General Experience: 8 years of relevant experience.

Functional Responsibility: Responsible for providing unique cyber domain expertise and guidance to the delivery team and stakeholders. Work may encompass one or more specialty areas of cyber security, cyberspace, and cyber operations, including providing expert knowledge and insight into compliance, cyber hunt, incident response, risk and vulnerability assessment, and emerging cyber threats requirements; guiding technical support to penetration testers,

incident handlers, cyber analysts, and product support personnel relative to the cyber arena; assisting in the management of complex networks and systems of differing classification levels systems; integrating cyber security requirements with communication and IT; and utilizing other principles in the professional body of knowledge.
Minimum Education: Bachelor's Degree.

3. Intermediate Cyber Analyst

Minimum/General Experience: 2 years of relevant experience.

Functional Responsibility: Supports development of technical solutions to support client's requirements in solving moderately complex network, platform, and system security problems. They will assist with the management and administration of enterprise security programs. Responsibilities include: assisting with incident response, cyber hunt activities, penetration testing, cyber system engineering, development, and monitoring. Will also conduct security control assessments with cyber security stakeholders, collect and review artifacts and evidence for compliance with security controls, and document assessment results in a security assessment report and risk assessment report.

Minimum Education: Bachelor's Degree.

4. Journeyman Cyber Analyst

Minimum/General Experience: 1 year of relevant experience.

Functional Responsibility: Will have a basic understandings of concepts and terms related access control systems; cryptography; security architecture; operations security; applications security and systems development; statutory and regulatory compliance; forensics, investigations, or security ethics. Will assist in penetration testing, incident response and cyber hunt activities as well as systems certification and accreditation projects, including the development of system documentation, system hardening, safeguard implementation, vulnerability assessments, and risk analysis. They will assist with the management and administration of enterprise security programs.

Minimum Education: Bachelor's Degree.

5. Journeyman Information Cyber Security Analyst

Minimum/General Experience: 3 years of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor information technology security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Bachelor's Degree.

6. Junior Information Cyber Security Analyst

Minimum/General Experience: 2 year of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor information technology security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Minimum Education: Bachelor's Degree.

7. Senior Cyber Analyst

Minimum/General Experience: 3 years of relevant experience.

Functional Responsibility: Responsible for providing customer support in solving all phases of complex cyber security related technical problems. Reviews and recommends cyber security solutions to customer problems based on an understanding of systems test results. Conducts security control assessments with cyber security stakeholders, collect and review artifacts and compile a body of evidence for compliance with security controls, and document assessment results in a security assessment report and risk assessment report. Particular attention placed on Guard,

Firewall, host and network Intrusion Detection/ Protection Systems, Penetration Testing, Cyber Hunt activities, Risk and Vulnerability Assessments.

Minimum Education: Bachelor's Degree.

8. Senior Cyber Security Analyst

Minimum/General Experience: 3 years of relevant experience.

Functional Responsibility: Contributes to generating responses to cyber crisis or urgent situations to mitigate immediate and / or potential threats. Uses mitigation, preparedness, and response and recovery approaches, as needed, to maximize survival of life, preservation of property, and information security.

Minimum Education: Bachelor's Degree.

9. Senior Cyber Security Specialist

Minimum/General Experience: 5 years of relevant experience.

Functional Responsibility: Responsible for Information Assurance and Information Security, monitor and analyze alerts from Intrusion Detection/ Prevention Systems (IDS/IPS), firewalls, anti-virus, and other tools/systems. Responsible for the development, submission, and maintenance of various artifacts required to obtain Authority to Operate (ATO) for general and industrial networks. Establish documents and monitor the cybersecurity program and ensure compliance with all government and business cybersecurity requirements. Ensures that personnel with cybersecurity responsibilities are trained on cybersecurity requirements, operations, safeguards, and incident handling procedures. Perform information security and vulnerability assessments and penetration testing. Apply broad in-depth business and technical knowledge to establish technical direction and priorities. Responsible for defining IT governance, risk and compliance program elements and the plan to monitor active IT compliance, develop and maintain policies, procedures, baselines and standards working closely with other managers within IT and across the business.

Minimum Education: Bachelor's Degree.

10. Senior Cyber Software Engineer

Minimum/General Experience: 5 years of relevant experience.

Functional Responsibility: Conducts systems security analysis and implementation, system engineering, electrical design, design assurance, testing, security software engineering, program design, configuration management, integration, and testing of cyber security products and techniques. Participates in special projects or investigations into specific technology or solution issues and research and piloting of new technologies. Serve as a point of contact for engineering efforts while maintaining compliance with the customer's policies and guidelines.

Minimum Education: Bachelor's Degree.

11. Senior Information Cyber Security Analyst

Minimum/General Experience: 8 years of relevant experience.

Functional Responsibility: Plan, implement, upgrade, or monitor information technology cyber security measures for the protection of computer networks and information. May ensure appropriate IT security controls are in place that will safeguard digital files and vital electronic infrastructure. May respond to computer security breaches and system viruses. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Minimum Education: Bachelor's Degree.
