IMC Partners with CyrusOne to Expand Data Center Services in the Federal Space

Dulles, VA – Innovative Management Concepts, Inc. (IMC), an information technology services and olutions company, announces a strategic partnership with Cyrus One (NASDAQ: CONE), a premier global data center provider, to expand data center services and offerings and improve access to these services in the Federal space. As a result of the partnership, CyrusOne's services will be added to IMC's General Services Administration (GSA) schedule, enabling government agencies to procure these timely and mission-critical services, including data center hosting and cloud management. IMC is also taking a footprint in CyrusOne's Northern Virginia data center campus.

The IMC/CyrsuOne partnership will provide the means for government entities to comply with the Data Center Optimization Initiative and fulfill the data center requirements of the Federal Information Technology Acquisition Reform Act.

"IMC's partnership with CyrusOne will be a win for not only both companies, but also a win for Federal agencies in accessing the data center and cloud services that are a current priority," noted IMC's CEO, Dr. Robert Might. "IMC's proven methodologies for information technology service delivery in the data center environment, combined with CyrusOne's award-winning data center campuses, allow IMC to provide highly resilient, scalable, and cost-effective cloud and data center services."

"This partnership is a significant step forward in providing a streamlined mechanism for Federal agencies to upgrade their legacy data centers," said John Gould, Executive Vice President of Global Sales at CyrusOne. "As IMC's go-to-market data center provider, we can better serve our government entities and provide them with state-of-the-art data center space that will enable them to consolidate their data center footprint and increase the efficiency of their IT portfolio."

IMC offers a comprehensive range of hosting solutions to the Federal government and commercial organizations ranging from cloud services to simple colocation to fully managed services. IMC provides to its Federal customers a dedicated and elite hosting team of Tier 1, Tier 2, and Tier 3 engineers and Subject Matter Experts with extensive experience in a wide range of cloud computing

environments, systems, and application support, security, hardware and software platforms, as well as the unique privacy, security, and regulatory characteristics of the Federal environment. Find out more about IMC's data center and cloud services at http://www.imcva.com/cloud.html.
